## General Manager Statement

---

Our mission is to deliver exceptional services that exceed our clients' expectations while maintaining the highest standard of professionalism, integrity, and quality. With our diverse expertise and commitment to excellence, we strive to be a leading player in the engineering consulting industry in Riyadh and beyond.

We believe that success is not just measured by our achievements but also by the positive impact we create on the community and the environment. We are committed to being a socially responsible and environmentally conscious company that contributes to the sustainable development of our society.

## Why Drwazah

---

### Vision

Only the ideal architecture that gives us exceptional spaces to live, work and live with

### the past of the future

Philosophy and conviction

- Technology clearly contributes in our modern life
- Ideal architecture encourages and enables people to live more sustainably and comfortably.
- Architects have a leading role in changing the culture of the world
- Architects can take someone's dreams and make them better
- Good architecture is about having fun.

### Added value

- Ensure excellence in all our work.
- Listening and understanding must provide high quality service
- Honest, accurate, fast and reliable service. Continuous improvement of services.
- Focusing on small details is very important and useful for us so that we leave our mark

### Goals and objectives

- Excellence in design
  - Create projects
  - Share enthusiasm and knowledge using spi technology
  - Work and live the way we speak
- 

# Architecture Design

- We have a multidisciplinary approach and rich experience that we can design all projects, taking into account innovation, profitability and quality, and the working environment
- We support the interaction between different departments so that we can follow the implementation of projects and methods to overcome all complexities

We specialize in all phases of the project, including

- \* Forward-thinking engineering.
- \* Design concept.
- \* Preliminary conception.
- \* Schematic design.
- \* Detailed design.
- \* Written parts.
- \* Specifications.
- \* Declaration of materials.
- \* CAD computer-aided drawing

# Landscabe Desgin

- We have a multidisciplinary approach and rich experience that we can design all projects, taking into account innovation, profitability and quality, and the working environment
- We support the interaction between different departments so that we can follow the implementation of projects and methods to overcome all complexities

We specialize in all phases of the project, including

- \* Forward-thinking engineering.
- \* Design concept.
- \* Preliminary conception.
- \* Schematic design.
- \* Detailed design.
- \* Written parts.
- \* Specifications.
- \* Declaration of materials.
- \* CAD computer-aided drawing

# Interior Design

We offer complete, turnkey design services for residential, commercial and public spaces

It is a global process that begins with the design, detailed work and ends in the construction plans phase.

We follow international design standards around the world to ensure a professional level compatible with the world's leading companies

# Structural Design

Innovation and ingenuity come together in our

Through our experience of challenging the limits of structural engineering, we have made creative art highly efficient, technically innovative and economically assemblable designs.

Our teams have the multidisciplinary experiences, capacity and resources necessary to manage projects in several fields.

## We offer a wide range of specialized services from Structures

- Competence in design with all structural materials.
- 3d analytical modeling.
- Static, dynamic, linear and non-linear analysis.
- Durability design including corrosion and fire protection.
- Structural evaluation, rehabilitation and adaptation of existing structure.
- Value engineering.

# Conception MEP

## ME design

We work hard to provide engineered solutions that take into account the client's budget and time requirements.

Our teams are led by experienced project managers and each project receives additional support from quality control.

All of our designers and engineers are active in suggesting green building design as much as possible. We believe that sustainable design is very important.

## Our specialized services

- \* Drwazah specializes in mechanical, electrical and plumbing engineering consultancy and is dedicated to providing an exceptional level of service for each customer.
- \* Mechanical
- \* Electric
- \* Sanitary Plumbing.

# Engineering Arbitration

**We specialize in all phases of the project, including**

- Forward-thinking engineering.
- Design concept.
- Preliminary conception.
- Schematic design.
- Detailed design.
- Written parts.
- Specifications.
- Declaration of materials.
- CAD computer-aided drawing.

Arbitration is an alternative method of resolving disputes out of court, by adjudication of an arbitrator. Arbitration procedures are, by their nature, characterized by less formal ongoing legal procedures that are characteristics of courts. In order to discuss such a subject in the presence of an arbitrator, the parties must reach a written agreement. Such consent may be obtained before a dispute arises between the parties by including an arbitration clause in the contract or pursuant to a late agreement when the conflict broke out. The arbitration procedure ends when the judgment is issued and submitted for the approval of the court. An arbitrator's judgment approved by the court is considered a judgment of the court, which is enforceable through the enforcement office.
